Subject: pyrolysis/gasification question

Mr. Granquest,

I spoke to a few colleagues and there really aren't any tables to direct you to for emission limit requirements. The emission limits in CAA Section 129 rules are for combustion of waste and not for pyrolysis or gasification. Some rules under Section 112 contain language for pyrolysis or gasification but without more information about the type of waste or fuel stream it is hard to direct you to the appropriate rule. However to be sure that the unit in question is a gasification or pyrolysis unit from regulatory point of view the Applicability Determination Index (ADI) could help you make that determination. The ADI can be found here: <https://cfpub.epa.gov/adi/>. Sorry I wasn't able to help you more. If you have additional questions, please let me know.

Sincerely, Margaret
